

## **Inclusive Stem Confluence 2024**

With success of the past five year, we are excited to bring back a better, bigger and in-person Inclusive Stem Confluence 2024. The event will focus on two crucial themes-inclusive hiring and inclusive innovation.

### **When?**

24th and 25th January 2024

## The Details

This year's event will include workshops and trainings, networking, disability sensitization, mentorship sessions, and an ideathon/hackathon.

## Workshops and Training Programs

This year as part of the Inclusive Stem Confluence, we will be organizing a series of workshops, training and discussions on digital accessibility, inclusive hiring and assistive technology in the global south. Learn from accessibility and D&I experts, other companies, researchers, universities and government departments about their work and initiatives. There will also be role-specific sessions for developers, designers among others.

## Networking

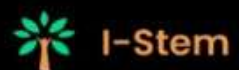

One of the key feedback from our previous events is the strong community participants have found at the event. Our employer partners have also found interactions with our community most rewarding, often resulting in hiring opportunities. Given this, networking both within the community and with our employer partners will be a key component of the confluence.

## **Fellowship**

A key highlight will be meeting our fellows, a group of 20 high potential students and professionals with disabilities leading the way.

## **Ideathon/hackathon**

An inclusive hack involving participants with and without disabilities, building awesome technology and developing empathy in the process.

# I-Stem Confluence 2024

Registrations open. Contact us at [info@inclusivestem.org](mailto:info@inclusivestem.org).  
Invite-only for participants with disabilities.
